EDUCATION

University of California, Berkeley

May 2028

Bachelor of Science in Electrical Engineering & Computer Sciences

GPA: 3.73

Relevant Coursework:

- CS 61A/B/C - Introduction to Computer Programs & Data Structures & Computer Architecture
- CS 70 - Discrete Math & Probability; EECS 16A - Linear Algebra; Math 53 - Multivariable Calculus
- EECS 16B - Introduction to Circuits & Devices

Student Organizations: Computer Science Mentors, Society of Women Engineers, Cal Hiking & Outdoors Society

Mountain View High School, Mountain View, CA

June 2024

Burwen Scholar (top 10 GPA)

Academic GPA: 4.74 (W), 3.93 (UW)

WORK EXPERIENCE

Theo AI @ Async Labs

Software Engineering Intern

June 2025 – August 2025

- Built end-to-end RAG pipeline with LlamaCloud vector database and LLM recommendations for IT service AI agent to search historical IT tickets, reducing troubleshooting time through automated similarity matching and next-step generation.
- Researched and developed AI agent architectures for autonomous workstation management, conducting comparative analysis between ReACT and computer use models and creating 20+ reliable system administration scripts.

UC Berkeley Hybrid Robotics Lab

Research Intern with Professor Koushil Sreenath

June 2023 – August 2023

- Investigated environmental parameter effects on sim-to-real transfer performance for quadrupedal robot locomotion, contributing to research on bridging simulation-reality gaps.
- Implemented reinforcement learning algorithms with Proportional-Derivative control systems to optimize robotic movement patterns and improve motion stability.

Space Cookies, FIRST Robotics Team & Girl Scouts Troop

Software Captain

August 2020 – June 2024

- Led 20-person software team in developing autonomous subsystems and navigation, control systems, and code framework for competitive robotics using Java and GitHub version control.
- Designed and delivered 10-week technical workshop curriculum covering Java fundamentals, robotics software development, and codebase contribution workflows for new team members.

TEACHING & INVOLVEMENT

UC Berkeley Electrical Engineering & Computer Sciences (EECS)

CS 61B Tutor

June 2025 – August 2025

- Facilitated daily 2-hour labs and weekly discussion sections for 50+ students, delivering engaging mini-lectures and interactive lessons on data structures & algorithms concepts including trees, graphs, sorting algorithms, runtime analysis.
- Collaborated with course staff team to shape curriculum and maintain UCB course standards through exam development and grading, online forum support, and weekly staff meetings to optimize student learning.

Computer Science Mentors @ UC Berkeley

CS 61A Senior Mentor

January 2025 – Current

- Lead cohort of junior mentors and contribute to decision-making for student-run computer science mentoring organization serving 300+ students per course.
- Taught weekly CS 61A small-group sections (average student rating: 4.7/5), and mentor junior staff on effective instruction techniques for structure and interpretation of computer programs concepts.

SKILLS

Computer Science: Python, Java, Git/Github, SQL, Scheme

AI/Machine Learning: RAG pipelines, LLM integration, Vector databases (LlamaCloud), LangGraph

Systems & Hardware: Circuit analysis, Control systems, Robotics, Linux/CLI scripting

Languages: Mandarin Chinese (native/fluent)
